

Complete Referral and Documentation Software

Discover GoScripts for secure, HIPAA-compliant documentation, and more efficient patient care.

Prescriptions without paper.

GoScripts makes Brightree even better with a proven one-stop, end-to-end solution for prescription documentation. With integration, any updates you make within Brightree automatically appear in GoScripts, so patient records are always in sync and up to date without manual inputting or duplicate entry. Robust rules-driven technology streamlines the whole process, and all of your electronic files are stored securely in one place, courtesy of Brightree Document Management (BDM). Best of all, patients get their equipment—**fast**.

Denials and delays disappear.

- Simplify all you do with innovative technology from a brand you trust.
- Access real-time updates, and get full visibility into time-sensitive orders.
- Ensure complete, accurate, and audit-ready documentation the first time, with robust rules-driven technology based on HCPCS codes.

Online and on time.

Prescriptions get processed, patients get what they need, and you get reimbursed quickly. GoScripts is empowering. It allows HME suppliers to initiate the documentation process, so you can send and receive

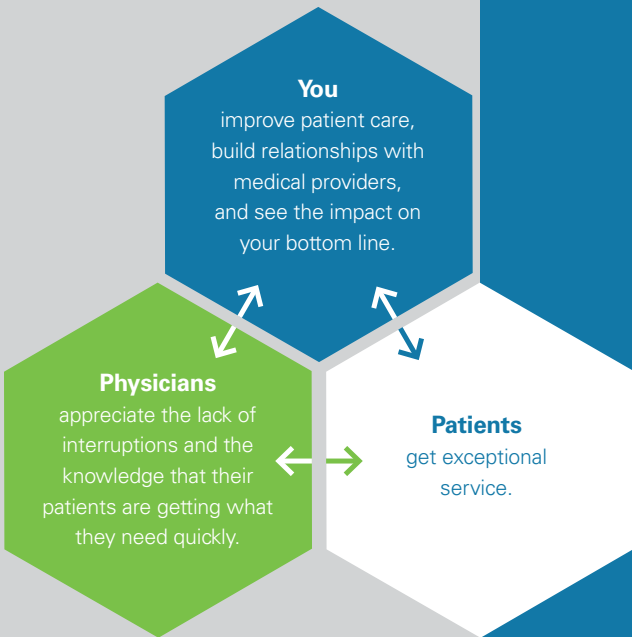

chart notes; recerts and renewals; as well as state-specific, Medicare, and private-payer forms. And doctors can log in and sign documents from anywhere, in seconds.

GoScripts is proven.

Stick with one of the industry's most trusted prescription documentation solutions. GoScripts has over fifteen years of expertise in the market.

No software and nothing to download.

GoScripts integrates seamlessly for the time and cost savings you need.

Goodbye paper. Hello GoScripts.

Integrated with Brightree, GoScripts minimizes time and costs, eliminates faxes, and delivers the efficiency you need to streamline the prescription documentation process.

“With GoScripts, all my documentation gets done quickly, and nothing’s left out. It’s saving me a lot of time, and I’m getting reimbursed faster, too!”

Frequently asked questions

- Q.** Does Brightree integrate seamlessly with GoScripts?
- A.** Yes, it does! And the integration merges patient records, so you no longer need to manually enter data. And best of all, Brightree Document Management (BDM) automatically stores all the records in one place, electronically, for a safe, end-to-end solution.
- Q.** Do you offer training for our staff?
- A.** We do. Training is available onsite or online through either live-chat or on-demand webinars.
- Q.** How do physicians access GoScripts? And is there a fee?
- A.** There’s no cost for medical providers—they just enroll through a simple one-page signature form.

Work is easier. Reimbursements are faster.

- Spend your day generating new orders, not chasing paper.
- Eliminate faxes, errors, duplicate requests, and incomplete orders.
- Standardize requests based on Medicare rules and guidelines.
- Minimize time and costs.
- Decrease the average wait time for documentation from roughly 11 days to 3 days.*

*Internal analyses of GoScripts platform. Data on file. Actual time may vary per individual based on actual documentation submitted.
